BLISTER SEALING MACHINE

SDS6C SERIES **MEDIUM SEMI AUTOMATIC ROTARY**

SDS6C SERIES DESIGNED FOR MEDIUM TO HIGHER VOLUME

Our SDS Series rotary type heat sealers are designed for medium to higher volume production requirements. These sealers may be used for conventional carded blisters, full face blisters and half-damshell styles as well as applications using Tyvek, foils and other heat sealable lid stock.

The SDS Series units are available in four (4), six (6) and eight (8) station designs. Models are available in standard sealing areas of 14 x 18 inches. For larger & custom size sealing areas, please refer to our ESDS series machines. The standard sealers feature one sealing station with the remaining stations used for loading / unloading of the products. The SDS Series rotary heat sealers are designed to include an optional automatic card feeding system and automatic package discharge system. Our modular plug and play type design allows these units to be added to existing SDS Series sealers at any time. Machine(s) can be ordered without these options when lower production rates are required. As production requirement increase these options can be added to provide increased productivity.
