### SKC SERIES DESIGNED FOR HIGH VOLUME

The SK Series continuous conveyer type skin packaging machines are designed for high volume protective packaging applications. These machines incorporate an radiant panel heating system, controlled by DLC temperature controllers for precise heat distribution, a porous conveyer belt, multiple turbine vacuum system for continuous vacuum as the board with parts travel over the vacuum area and a film pinch chain for automatic film unwind.

These machines are a sturdy welded steel construction with removable panels for servicing. The SK machines are available in different widths and lengths depending on the application. Available options are inline slitting rotary knives.
